DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 10/064,850. Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between claim 1 (line 14) and claim 20 (line 14) of the application and claim 1 (lines 19 & 20) and claim 20 (lines 14 & 15) of the copending application lies in the fact that the copending claims include many more elements and is thus much more specific. Thus the copending invention of claim 1 and 20 is in effect a "species" of the "generic" invention of claims 1 and 20. It has been held that the generic invention is "anticipated" by the "species". See *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993). Since claims 1 and 20 is anticipated by claims 1 and 20 of the copending application, it is not patentably distinct from claims 1 and 20 of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

NOTE: The Applicant has not disclosed where the gradual ninety-degree bend starts, therefore, the elongated slot of the copending application 10/064,850 ends in the gradual ninety-degree bend. Hence, the application reads on the copending application.
